System of Management: Getting a Handle on Enterprise-Wide Change  
Wednesday, June 19  
9:30-10:30 a.m. | **Brian Floyd**, President, Vidant Health & Chief Operating Officer, Vidant Medical Center  
**Jacob Parrish**, Vice President, Systems & Procedures, Vidant Health | During times of uncertainty and great organizational change, strong executive leadership and courage are critical to providing clarity and instilling confidence throughout a health system. This session will introduce a new system of operational leadership, rooted in data and business intelligence, which effectively engages physicians along with administrative and other clinical staff. This innovative model has allowed Vidant to focus on achieving desired goals without compromising culture. |

Driving Organizational Success Through Supply Chain  
Wednesday, June 19  
10:45-11:45 a.m. | **Jim Szilagy**, Chief Supply Chain Officer, University of Pittsburg Medical Center  
**Jessica Daley**, Vice President, HC Pharmacy, University of Pittsburg Medical Center  
**Patrick Flaherty**, Vice President, Supplier Performance & Decision Support, University of Pittsburg Medical Center | In a race to overcome decreased operating margins and survive in the shift to value-based care, victory lies in advanced supply chain strategies and operations. Through integrated processes and technologies that are supported by optimal staffing, supply chain is the cornerstone to driving sustainable results. In this session, learn how having supply chain at the C-suite table leads to overall organizational success - including labor and productivity improvements. Specific strategies designed to achieve maximum impact will be discussed. |

Launching Care Transformation in a Large Health System  
Wednesday, June 19  
3-4 p.m. | **Beth Weagraff**, Vice President, Care Transformation, Adventist Health System | Is your organization spread across several markets and functioning with wide variation in care approaches? In this session, learn how to create an integrated infrastructure which reduces variation and promotes reliable, standardized workflows. Specifics to be shared include: identification of challenges, strategic implications, governance, using baseline data, crafting dashboards and gathering collaborators to share learnings. |
| **CON-EXL4**  
Integrating Emerging Business Models: Where Do You Start?  
Thursday, June 20  
9:30-10:30 a.m. | **Ruth Krystopolski**, Senior Vice President, Population Health, Atrium Health | Payment models have operational consequences for health systems. Running multiple varied models simultaneously can create operational confusion, conflicting incentives, waste and uncertainty in network investments. This session will address multiple perspectives, which support blending the incentives of various payment models into a single, aligned, operationally effective performance improvement strategy. Models to be discussed include metric-driven fee-for-service, value-based reimbursement and direct to employer. This cutting-edge content will help you to effectively accelerate change in your organization. |

Hardwiring for the Journey, Not the Destination  
Thursday, June 20  
10:45-11:45 a.m. | **Rocco Orlando**, M.D., Chief Medical Officer, Hartford Health  
**Stephanie Calcasola**, Vice President, Quality & Safety, Hartford HealthCare | Health systems are complex, high-risk organizations. Becoming a high reliability organization (HRO) requires strategic prioritization, leadership commitment and a blueprint for sustainability. Hartford’s successful adoption of HRO has reduced safety events by 70%. In this session, learn from those who lead the charge how to achieve your quality and safety goals by hardwiring HRO behaviors in a large, complex healthcare system. |
| **CON-EXL6**  
Managing the Unmanageable: Medical Group Integration  
Thursday, June 20  
3-4 p.m. | **Dan Drake**, Senior Vice President, Vidant Medical Group | Each medical group has its own unique challenges related to organizational structure, demographics, staffing and infrastructure. To equalize the level of service, a medical group must establish a system of variance management which enables leadership to negotiate barriers, assuring consistent provider performance. Understanding what is working well and sharing it across the organization as well as addressing barriers in a meaningful way drives an organization towards achieving the quadruple aim. This session will highlight how to accelerate rapid change, improve patient access, elevate staff, establish performance standards, and increase provider and employee satisfaction all while building trust. |
